Naturally Better.

Arthrex Aesthetics™

Arthrex ACP® Double Syringe

- › Preparation of ACP I fluid PRF in 7 minutes
- › Rich in thrombocytes and fibrinogen
- › Without anticoagulants and poor in neutrophils¹
- › Preparation of microfat and SVF in conjunction with the ACA kit
- › Closed system

ACP Max™ System

- › Preparation of highly concentrated PRP containing autologous platelet-derived exosomes
- › Flexible processing of 30, 60, or 90 mL for up to 12× platelet concentrations over baseline²
- › Reduction of neutrophils by 98% and erythrocytes by 99%²
- › Closed system

Angel® System

- › One system for all PRP applications
- › Completely automated processing in a closed system
- › Indication-specific PRP production at the touch of a button
- › Up to 540 mL of patient blood can be processed with one processing kit
